- (e) Love
- (f) True
- (g) Slow
- (h) Join
- (i) Moral
- (j) Active

C-6602

Section-D

(Do as directed)

6. Read the passage carefully and answer the following questions :

6×1=6

Prevention is better than cure, and it is recognised that the only way to get rid of malaria completely is to get rid of the mosquitoes, which cause it. Malaria is always associated with damp and marshy land. This is not because the land is damp, but because the standing water is the breeding place of the mosquito, which begins its life as a larva. Malaria doesn't frequently occur in dry desert countries because mosquitoes cannot breed there. The only way to destroy mosquitoes is to prevent their breeding in standing water. This can be done by draining all ponds and pools and by keeping them covered in the breeding season with a film of kerosene oil which by depriving the larvae kills them.

Answer the following questions :

- (a) How can malaria be prevented?
- (b) In what places does malaria occur most?
- (c) In what places does malaria not occur frequently?

- (d) How can we prevent the breeding of mosquitoes?
 - (e) Give suitable title of the passage.
 - (f) Find the word from the above passage that convey the similar meaning for Nations.
7. Write a paragraph on any one topics given below :
- (a) Old is Gold
 - (b) A friend in need is a friend indeed
 - (c) Health is Wealth
